CAREER OBJECTIVE

Aspiring Data Scientist with strong foundations in applied machine learning, cloud-based ML platforms, and data engineering. Experienced in building production-quality Python pipelines, feature engineering, model training, evaluation, and deployment. Passionate about delivering ROI-driven solutions through automation, experimentation, and Generative AI applications.

EDUCATION

2023 – 2027	KL University Hyderabad – B.Tech in CSE (Data Engineering with AI)	CGPA: 9.45/10
2021 – 2023	Sri Chaitanya Junior College – Intermediate (MPC)	70%
2020 – 2021	P.N.M High School – SSC	90%

EXPERIENCE

AI Compliance Team Co-Lead & Data Analyst Intern – Finsentsis OS Jan 2026 – Present

- Developed ML-driven dashboards and applied statistical modeling for compliance analytics.
- Built and maintained data pipelines integrating SQL/NoSQL sources for batch and near-real-time reporting.
- Coordinated experiment tracking and model evaluation workflows using MLflow.

Summer Intern – TeraSoft Technologies, Hyderabad June 2025

- Supported AI-based content development and assisted in internal documentation.
- Validated datasets and workflows, ensuring accuracy in ML-driven applications.

PROJECTS

SmartMart: Automated Supermarket Analytics *Python, SQL, Pandas, Scikit-learn*

Designed an end-to-end analytics pipeline with feature engineering, model training, and deployment for product tracking and purchase prediction.

ForeSight: AI Demand Forecasting *MERN Stack, MLflow*

Implemented demand forecasting with ML models, experiment tracking, and deployment workflows.

LibraTrack: AI Library Management *Java, MongoDB*

Created a digital system enhanced with AI-based automation for book issue and return records.

GenAI Chatbot (Prototype) *Python, Hugging Face, FAISS*

Built a retrieval-augmented chatbot using transformer fine-tuning and vector database search for domain-specific queries.

SKILLS

Programming Languages	Python, Java, C
ML/AI Frameworks	Scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain
Databases	MySQL, MongoDB
ML Lifecycle Tools	MLflow, Weights & Biases
Data Engineering	Pandas, NumPy, Spark, Airflow
Cloud Platforms	AWS (EC2, S3, Lambda, SageMaker), Databricks
Version Control	Git
Other Tools	VS Code, Figma, MS Office (Excel, Word, PowerPoint)

ACHIEVEMENTS & CERTIFICATIONS

- **Certifications:** MongoDB Associate Developer, AWS Cloud Practitioner, Deloitte Data Analytics, NVIDIA Deep Learning, GitHub Foundation, LinguaSkills
- **Competitive Coding:** Solved 800+ problems across LeetCode, Codeforces, and HackerRank; peak LeetCode global rank 1644.

- **Research/Community:** Contributed to open-source ML repos and participated in Kaggle competitions (forecasting, NLP).
- **Leadership:** Volunteered in organizing college fests and represented KL University in throwball competitions Avinya and Ivarna.
