## PROFESSIONAL SUMMARY

Computer Science Engineering student (CGPA: 9.6/10) with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Software Engineering. Proficient in Java, Python, React, and SQL, with experience in building full-stack applications and REST APIs. Familiar with cloud technologies and interested in developing scalable software solutions.

## TECHNICAL SKILLS

|                |                                                                                         |
|----------------|-----------------------------------------------------------------------------------------|
| Languages:     | Python, Java, SQL                                                                       |
| Frameworks:    | FastAPI, React, Node.js                                                                 |
| Databases:     | MySQL, MongoDB                                                                          |
| Core Concepts: | Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs |
| Tools:         | Git, Jupyter Notebook, Postman                                                          |
| Cloud:         | AWS Cloud Practitioner                                                                  |
| Data & AI:     | Pandas, NumPy, Machine Learning                                                         |

## EXPERIENCE

Technical Team Member | ED-Cell, KL University 2024 – Present

- Collaborated with a team of 10+ members to develop AI-driven solutions.
- Organized 5+ hackathons and workshops with Red Hat and Automation Anywhere.

## PROJECTS

Forest Biomass and Carbon Stock Analysis Python, PySpark, Pandas, Spark SQL

- Processed and analyzed 10,000+ ecological records using distributed PySpark pipelines and Spark SQL for efficient large-scale data processing.
- Performed exploratory data analysis and correlation analysis to identify key factors affecting ecosystem carbon density and biomass distribution.
- Improved processing efficiency by 40% compared to traditional Pandas workflows and generated insights to support environmental sustainability studies.

### Smart Artisan Manager

- React, Node.js, MongoDB, Google Gemini
- Built an AI-powered business management platform for handling inventory, material tracking, and sales operations.
  - Integrated Google Gemini to provide intelligent business recommendations, pricing insights, and personalized assistance for decision-making.

Edu Event Link – Community Platform FastAPI, React

- Developed a centralized platform for university announcements, event management, and community discussions with a scalable architecture.
- Designed and implemented RESTful APIs using FastAPI and integrated them with a React frontend for seamless user interaction.
- Incorporated an AI-based content moderation mechanism to detect and filter harmful content before publishing, reducing manual moderation efforts.

## EDUCATION

B.Tech in Computer Science Engineering Expected 2027  
KL University, Hyderabad CGPA: 9.6/10

## CERTIFICATIONS AND ACHIEVEMENTS

- Winner – BeingZero Hackathon.
- MongoDB Certified Associate Python Developer.
- AWS Certified Cloud Practitioner.
